Education

The University of the West Indies

(September 2022 - May 2025)

B.S. Software Engineering

- **Relevant Coursework:** Software Engineering, Discrete Mathematics, Dynamic Web Development I, Object Oriented Programming

Campion College

(September 2015 - July 2022)

Honour's High School Diploma

Projects

DreamLogger (*Solo Contributor and Maintainer*)

(2023 - Present)

- Developed a feature-rich dream logging platform using Next.js, TypeScript, and Prisma, seamlessly integrating AWS services for scalability in over 5,000 lines of code.
- Designed and implemented a captivating front-end with custom components, global state management, and efficient data fetching, ensuring a secure user experience through HTTPS, client-side encryption, and secure cookies.
- Implemented robust user authentication and authorization with Next-Auth, Google's OAuth provider, and various security measures, guaranteeing data protection and privacy.

Green's Restaurant & Pub Management Website (*Solo Contributor and Maintainer*)

(2022 - Present)

- Streamlined inventory management processes, allowing users to create, manage, and analyze inventory data effortlessly in over 7,500 lines of code.
- Leveraged historical data analysis to optimize stock levels and enhance operational efficiency, and implemented a location-specific inventory management system for smooth tracking and movement of items between areas.
- Developed and incorporated a highly configurable invoice generation module, enabling precise and adaptable billing for customers.

Robertify (*Solo Contributor and Maintainer*)

(2021 - Present)

- Developed a music bot that seamlessly integrates with a wide range of music sources, including YouTube, Spotify, and Deezer, catering to diverse user preferences.
 - Demonstrated proficiency in architecting and managing interconnected microservices, utilizing technologies such as NestJS, Java Spring, Ktor, and Redis. This approach enhances system scalability, performance, and responsiveness.
 - Deployed the bot, serving a vast and diverse user base of over 800,000 individuals worldwide, showcasing the project's significant reach and influence within the user community.
-

Work Experience

Freelance Web Development

(2024 - Present)

- Developed responsive, user-friendly websites using ReactJS in TypeScript. Ensured cross-browser compatibility and implemented SEO best practices.
- Worked closely with clients to understand their business needs and translated them into functional web applications. Provided ongoing maintenance and updates as required.
- Troubleshoot and resolved web development issues in a timely and accurate manner. Continually stayed up-to-date with the latest web technologies.
- Managed all aspects of the web development lifecycle, from initial concept and design to testing, implementation, and support.

Arcim LLC

(2020 - 2021)

Content Developer

- Constructed feature ideas for gameplay content and outlined technical requirements for new content implementation. Implemented content that resulted in a 666% increase in average daily users.
 - Participated in collaborative team activities focused on the conception, development, and production of products.
 - Managed and produced the graphic design for product marketing.
-

Skills

Programming Languages: Kotlin, Java, Javascript/Typescript, CSS, HTML, C/C++, Python, SQL

Programming Frameworks & Libraries: ReactJS, Next.js, Express, NestJS, TailwindCSS, Sass, Java Spring
